FLEXIBLE METAL HOSE ASSEMBLIES

THE ASSOCIATION FOR HOSE AND
ACCESSORIES DISTRIBUTION

FLEXIBLE METAL HOSES

FLEXIBLE METALLSCHLÄUCHE

Construction:

Annularly corrugated metal bellows hydraulically formed from butt-welded tubes.

Materials:

Bellows made of austenitic stainless steel X10CrNi Ti 18 9, DIN 1.4541 (equivalent to AISI 321) as per DIN 17440 bright.

Braiding made of stainless steel wire X5CrNi 18 9, DIN 1.4301, (equivalent to AISI 304).

End connections either stainless steel or carbon steel.

Other materials on request.

Connections:

Flanges, male or female threaded ends, swivel unions, welding ends.

Nominal diameters:

DN 8 (5/16") - DN 50 (2")

Pressure Ratings:

up to max. 80 bar operation pressure depending on nominal diameter and operation temperature.

Temperature ranges:

- 196°C up to + 800°C depending on the material

Operation applications:

Conveying lines for liquid or gaseous media, particularly suitable for corrosive substances, such as acids and chemicals where pressure, temperature, vacuum, vibration problems are existing.

Order-No.:

without braiding order-no. ASS (DN) FHU
with single-ply stainless steel wire braiding order-no. ASS (DN) FH

Konstruktion:

Ringförmig gewellte Metallschläuche aus stumpfgeschweißten Rohren hydraulisch geformt.

Materialien:

Faltenbalg aus austenitischem Edelstahl X10CrNi Ti 18 9, DIN 1.4541 (vergleichbar AISI 321) gemäss DIN 17440 blank.

Ummantelung auf nichtrostendem Edelstahl-Draht X5CrNi 18 9, DIN 1.4301 (vergleichbar AISI 304).

Anschlüsse aus nichtrostendem Edelstahl oder unlegierte Stahl.

Andere Materialien auf Anfrage.

Anschlüsse:

Flansche, Innen- und Aussengewinde, Überwurfmuttern, Schweißenden.

Nennweiten:

DN 8 (5/16") - DN 50 (2")

Druckbereiche:

bis max. 80 bar Betriebsdruck abhängig von der Nennweite und der Betriebstemperatur.

Temperaturbereiche:

- 196°C bis + 800°C Material abhängig

Anwendungsbereiche:

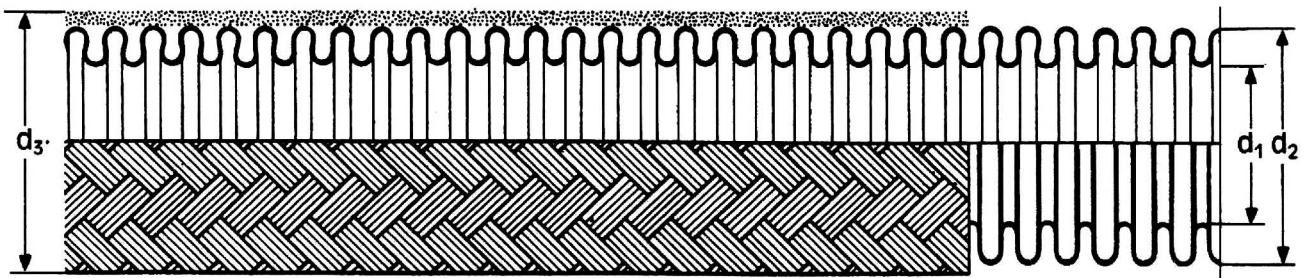

Förderleitungen von flüssigen und gasförmigen Medien, insbesondere geeignet für korrosive Substanzen, wie z.B. Säuren und Chemikalien, wo Probleme bezüglich Druck, Temperatur, Vakuum und Vibration bestehen.

Bestell-Nr.:

mit Ummantelung Bestell-Nr. ASS (DN) FHU
mit einlagiger Edelstahl Drahtgeflechts-Ummantelung Bestell-Nr. ASS (DN) FH

Dimensions in mm / Masse in mm

Effect of temperature:

in conformity with DIN 2401

Flexible metal hoses can be used at room temperature (20°C) up to the pressure stage given in the tables.

Reduction coefficients given in the table below should be used for determining the permissible operation pressure at increased temperatures.

$$P_{\text{perm.}} = PN \times k_t \text{ (bar)}$$

(°C) Operation temperature / Betriebstemperatur:

(k_t) Reduction coefficient DIN 1.4541 / Reduzierungs-Beiwert DIN 1.4541:

°C	20	100	150	200	250	300	350	400	450	500	550	600
k_t	1,0	0,96	0,86	0,81	0,76	0,66	0,64	0,61	0,59	0,58	0,57	0,50

Please state in your order sheet:

Flexible metal hoses, order-no., nominal diameter (DN), pressure rating (PN), materials, connections, medium and operation temperature as well as details of application.

Temperaturbegrenzung:

in Übereinstimmung mit DIN 2401

Flexible Metallschläuche können bei Raumtemperatur (20°C) bis zu der Druckstufe gemäss Tabelle eingesetzt werden.

Der Reduzierungs-Beiwert gemäss nachfolgender Tabelle soll zur Ermittlung des zulässigen Betriebsdruckes bei steigender Temperatur dienen.

$$P_{\text{zul.}} = PN \times k_t \text{ (bar)}$$

Bei Bestellung bitte angeben:

Flexible Metallschläuche, Bestell-Nr., Nennweite (DN), Druckbereich (PN), Materialien, Anschlüsse, Medium und Betriebstemperatur sowie Angaben über den vorgesehenen Einsatz.

Technical modifications reserved. / Technische Änderungen vorbehalten.

STAINLESS STEEL CORRUGATED FLEXIBLE METAL HOSE

STANDARD PRESSURE HOSE

TYPE

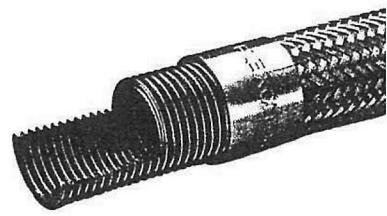

- **UFBX0 UNBRAIDED**
- **UFBX1 SINGLE BRAID**
- **UFBX2 DOUBLE BRAID**

END CONNECTIONS FOR CORRUGATED FLEXIBLE METAL HOSE

End connections for corrugated flexible metal hose used under pressure are normally attached by welding or silver-brazing.

Welded assemblies are suitable for temperatures up to the maximum tubing rating and silver-brazed assemblies are suitable for temperatures up to 250°C.

TERMINATIONS

End connections are available with terminations to current European and American standards.

Screwed - Male or Female

B.S.P.T. or N.P.T.

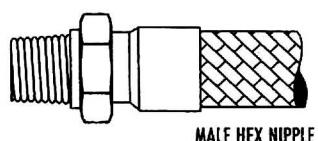

Flanged - AS2129 (BS10 Table D, E, F, H etc.)

AISI B16.5 (ASA 150, 300 etc.)

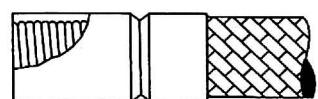

DIN 2532-2545

METALS

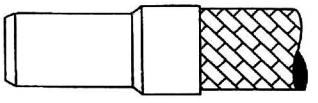

End connections are regularly stocked in stainless steel, carbon steel and copper alloy.

IV. MOTION

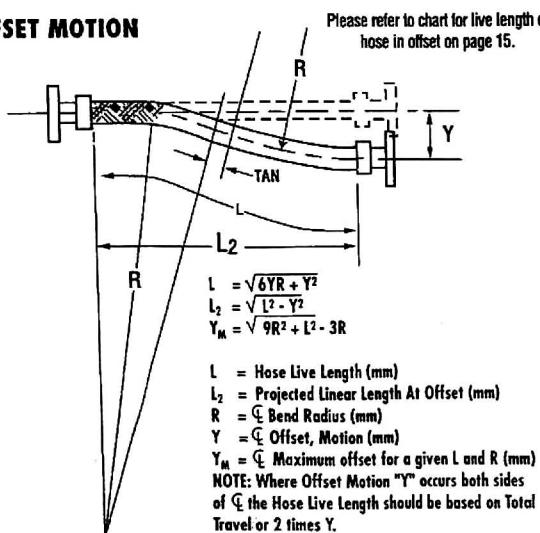

Most industrial applications can be reduced to one of five classes of motion: (1) Angular; (2) Axial; (3) Offset; (4) Radial; or (5) Random.

- Angular Motion:** Motion that occurs when one end of a hose assembly is deflected in a simple bend with the ends not remaining parallel. Angular motion may be incorporated in an installation to accommodate misalignment and vibration only, but must not be used to accommodate expansion that would result in unloading the braid.

- Axial Motion:** This type of motion occurs when one end of a hose assembly is deflected along its longitudinal axis. Axial motion is applicable to annular corrugated, unbraided flexible hose only. Neither helical hose nor braided hose should be used in axial motion applications.
- Offset Motion:** Motion that occurs when one end of the hose assembly is deflected in a plane perpendicular to the longitudinal axis with the end remaining parallel. Offset is measured in inches of displacement of the free end centre line from the fixed end centre line. In offset motion applications, the offset should never be greater than one-fourth (25%) of the minimum centre line bend radius.

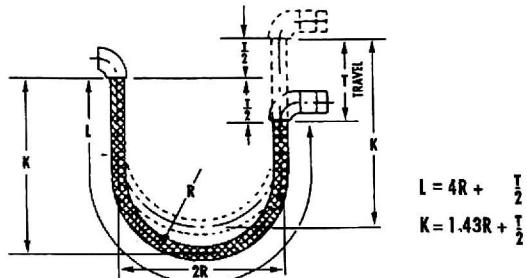

OFFSET MOTION

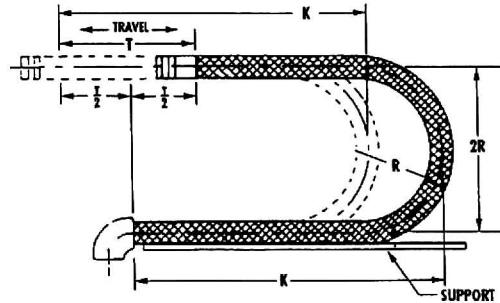

- Radial Motion:** This type of motion occurs when the centre line of a hose assembly is bent in a circular arc. In industrial applications, radial motion is most commonly found in travelling loops.

CLASS "A" TRAVELLING LOOPS

...FOR MAXIMUM VERTICAL TRAVEL

...FOR MAXIMUM HORIZONTAL TRAVEL

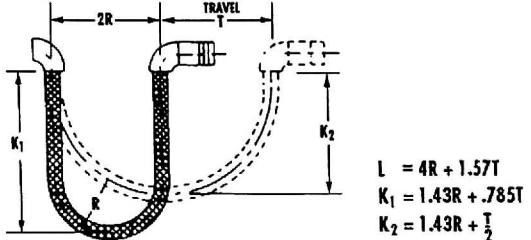

T = Total Travel (mm)

L = Hose Live Length (mm)

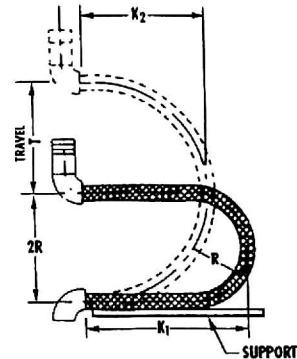

R = Centre Line Bend Radius (mm) K = Loop Length (mm)

CLASS "B" TRAVELLING LOOPS

...FOR SHORT HORIZONTAL TRAVEL

...FOR SHORT VERTICAL TRAVEL

NOTE:
In loop installations both connections and travel should be in same plane as the bend.
